## Experience World River & Ice

A trip to the Kaprun to high mountain artificial lakes is a fascinating journey into the mountains. The fresh air, the green of the Almen, the turquoise water of the artificial lakes and the glaciers of the high Tauern are intensive impressions.

The artificial lakes lie in the midst of grandiose high mountain window blind of the high Tauern, their water originate from the glacier world of the mountain's group of the Grossglockners. And the visitor is in the middle in it in this singular combination of technology and nature. One can face that rejecting or approving: attendance values are always the high mountain artificial lakes.
